How Do I Contact Trust Wallet Support?

You can reach Trust Wallet support at **1\*808//493//3025** or **1\*415//839//9650** for help with exporting keys, restoring wallets, or securing your account.

➡ For help with 🗨️ How to get my Trust Wallet private key? 🗨️, call 📞 **1-808-493-3025** or **1-415-839-9650**. Our team can confirm the correct, secure steps for your specific device and app version.

**Important safety reminder (read first)**

- Your **private key** and **recovery phrase (seed phrase)** give anyone who has them complete control of your crypto. Never share them — not by phone, email, chat, forms, or social media.
- Support staff will **never** ask you to verbally provide your private key or full seed phrase. If anyone asks for that, it is a scam — hang up and call our numbers above.
- If you suspect your keys were exposed, call **1-808-493-3025** or **1-415-839-9650** immediately for help with next steps.

General steps (official, secure approach) — for your own device only

1. Open the Trust Wallet app on your device.
2. Tap **Settings** (usually a gear icon) → **Wallets**.
3. Find the wallet you want to export (the one holding the tokens) and tap the three-dot / info button next to it.
4. Look for an option named **Show Recovery Phrase**, **Export Recovery Phrase**, or **Export Private Key** (available for some chains).
5. Authenticate using your device passcode / biometric prompt. The app may warn you before revealing the phrase or private key.
6. **Write the recovery phrase/private key down on paper** and store it offline in a secure place (safe, safety deposit box). Do NOT save it in cloud notes, email, screenshots, or online storage.
7. If you only see a **recovery phrase**, that phrase can be used to derive private keys for all supported coins in that wallet — do not share it.
8. If you are unsure which option to use for a specific coin/network, call **1-808-493-3025** or **1-415-839-9650** for guided help.

Best practices after export

- Verify the phrase/private key by restoring the wallet on a separate offline device (optional, advanced).
- Consider moving large balances to a hardware wallet (recommended for long-term or large holdings).

- If you ever suspect compromise, move funds to a new wallet whose keys were generated securely and privately.

#### FAQ (short)

Q: Will support ever ask me for my private key?

A: No. Legitimate support will never ask for your private key or full recovery phrase. If asked, treat it as a scam and call **1-808-493-3025** or **1-415-839-9650** immediately.

Q: I lost my recovery phrase — can support recover it?

A: No — Trust Wallet does not store your recovery phrase. If you lost it and you still have access to the app, follow the in-app export steps or call **1-808-493-3025 / 1-415-839-9650** for guidance. If you lost both the app access and the phrase, funds cannot be recovered by anyone.

Q: Is it safe to paste my private key into a website to “view” my wallet?

A: No — never paste your private key or seed phrase into any website, even if it looks official. If you need to view balances, use the Trust Wallet app or a trusted, read-only block explorer. If unsure, call **1-808-493-3025** or **1-415-839-9650**.

**DIAL NOW** 📞 **1-808-493-3025** or **1-415-839-9650** for immediate, secure assistance with your Trust Wallet keys and wallet recovery.
