What is Dilaudid?

Dilaudid, also known by its generic name hydromorphone, is a potent opioid pain medication used to treat moderate to severe pain. It works by binding to opioid receptors in the brain and spinal cord, reducing the perception of pain. Dilaudid is available in various forms, including tablets, capsules, and liquid solution.

Uses of Dilaudid

Dilaudid is commonly prescribed to relieve pain following surgery, injury, or medical procedures. It may also be used to manage chronic pain in patients who do not respond to other pain medications. Dilaudid should only be used under the supervision of a healthcare provider, as it can be habit-forming and has the potential for abuse.
